

WHAT IS DIFFERENCE?

Woodchip Cement Board
(Cement Board)

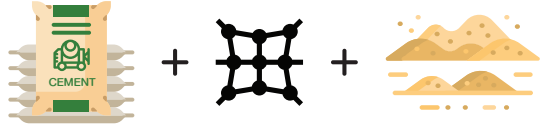

Fiber Cement Board
(Fiber Board)

Cement + Woodchip

Component

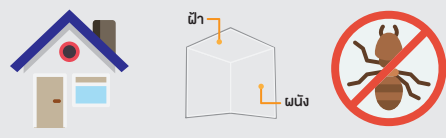

Cement + Cellulose Fiber + Silica

Insect Resistant. Can be used for **Wall & Floor function**/ Internal & External used

Usage

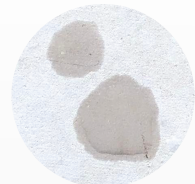

Insect Resistant. Can be used for **Ceiling & Wall function** / Internal & External used

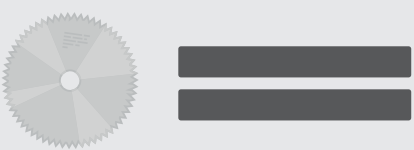

Smooth Surface , Dark Gray Color, look like bare cement and less water absorption rate

Water absorption at the surface

Rough Surface , Light Gray Color and higher water absorption rate on surface

Strong , Durable , Difficult to break
Easy to cut with saw blades
(cutting like wood)

Feature

Tough , Flexible , Bendable
Can be cut with diamond cutting blades

Ready to use surface or cover/paint with colorless coating to extend product life

Painting

Need to paint or Cover the surface
